Görkem Köroğlu

Senior Business Analyst | Banking & Financial Technologies |
Systems Analysis | Data-Driven & AI-Aware
İstanbul, Türkiye

Özet

Senior Business Analyst with experience in banking and insurance technologies, specializing in systems analysis, cross-border payment solutions, and data-driven problem solving. I work at the intersection of business needs and technical implementation, translating complex requirements into functional and technical solutions across core banking and digital payment platforms. My experience includes API and web service integration analysis, SQL-based data validation, functional specification design, and end-to-end involvement in Agile delivery processes. Currently, I contribute to core banking and cross-border payment platforms supporting international banking operations, focusing on reliable and scalable payment workflows and system improvements. With a background in Management Information Systems and hands-on experience in data analytics and Python, I am particularly interested in leveraging data-driven approaches and AI-aware solution thinking to enhance decision processes and system efficiency. Key focus areas: • Systems and functional analysis • Banking and financial technology solutions • Cross-border payment platforms • API / Web Service integration • SQL-based data analysis and validation • Agile delivery and UAT coordination • Data-driven business improvement • AI-aware analytical approaches I am open to opportunities where business analysis, systems thinking, and data-oriented decision support intersect within banking, fintech, and digital transformation environments.

Deneyim

Yapı Kredi Teknoloji
Senior Business Analyst
Ekim 2024 - Present (1 yıl 8 ay)
Γε63e

Contributing to core banking and cross-border payment platforms within the Abroad Banks Application Development organization, supporting international banking environments.

Key responsibilities include:

- Conducting end-to-end systems analysis for money transfer and payment workflows
- Translating business requirements into functional and technical specifications
- Performing API and Web Service integration analysis (XML / JSON mapping)
- Executing SQL-based data validation and defect analysis
- Defining business rules and validation logic for payment processes
- Supporting functional, service, and database testing activities
- Coordinating User Acceptance Testing (UAT) with business stakeholders
- Working in Agile / Scrum environments across distributed teams
- Supporting scalable and reliable release delivery across banking platforms

HDI Fibaemeklilik

Technical Business Analyst

Eylül 2022 - Eylül 2024 (2 yıl 1 ay)

Istanbul, Turkey

As a Technical Business Analyst at an insurance company, I leverage a diverse set of technical skills, including PL/SQL, Jira, and Data Modeling, to enhance system efficiency and user experience. My role involves:

Collaborating with Business Units: Working closely with business units to accurately understand their needs and translating these requirements into functional specifications and UI designs. This collaboration ensures

that developments are precisely aligned with business goals, enhancing operational efficiency.

Leading Test and Implementation Phases: Orchestrating the preparation and execution of test scenarios and user acceptance tests, leading to noticeable improvements in system reliability and user satisfaction. My role in monitoring these processes end-to-end guarantees that transitions to live environments are seamless and that post-live support is effectively provided.

Problem-Solving and Continuous Improvement: Utilizing SQL Developer for data analysis and system updates in response to business unit needs. Identified and resolved critical system errors within an average of 24 hours, significantly enhancing system reliability. My proactive approach to identifying and resolving system errors enhances system integrity and contributes to ongoing improvements in system performance.

Effective Communication and Project Management: Regularly updating stakeholders on project statuses and meticulously preparing and monitoring periodic work plans. My commitment to transparency and effective communication facilitates the smooth progress of projects and ensures alignment with project timelines and objectives.

Professional Development: Demonstrating dedication to professional growth through continuous learning and the application of new technologies and methodologies, which contribute to the advancement of our systems and practices.

Veri Bilimi Okulu

Data Science & Machine Learning Bootcamp Participant

Mart 2022 - Eylül 2022 (7 ay)

Data Science & AI Fundamentals: Journeyed through the essential landscapes of Machine Learning, Artificial Intelligence, and Data Science. Mastered the alchemy of transforming data into insights with Python (Numpy, Pandas, Matplotlib, Seaborn, Plotly), SQL, and powerful visualization techniques.

Technical Toolkit: Sharpened my arsenal with Python programming—covering everything from Data Structures to Exploratory Data Analysis (EDA)—and wielded tools like PyCharm, Git, and Linux with agility.

CRM Analytics Wizardry: Unveiled the secrets of Customer Relationship Magic, mastering Cohort Analysis, CLTV, RFM segmentation, and foretelling sales with the BG-NBD and Gamma-Gamma models.

Recommendation Systems Enchanter: Crafted bespoke pathways of discovery with Association Rule Learning, Collaborative Filtering, and Model-Based Matrix Factorization, blending them into a powerful elixir of Hybrid-Based Recommendations.

Advanced Sorcery in ML: Advanced through specialized spells in both supervised (e.g., CART, KNN) and unsupervised learning techniques (e.g., K-Means, PCA), including the dark forests of NLP and the time-shifting sands of Demand Forecasting & Time Series Analysis.

Mina Proje Yönetim

Data Science Intern

Ağustos 2020 - Eylül 2020 (2 ay)

As a volunteer intern at this institution, besides learning new technologies, I increased my coding experience by developing projects that would comprehend the general logic of programming languages instead of memorizing each programming language specifically.

Data input -Data collecting (Web Crawling and Scraping using Python)
